# Hydro dip your Shoes

## Prepare

Jazz up your shoes by hydro dipping them with the White Knight Squirts spray paint range. What you need:

- Your favourite White Knight Squirts colours
- White Knight Squirts Undercoat
- Goggles
- Gloves
- Dust mask
- Painters tape
- A bucket

All of the items listed above can be found at your local Bunnings store.

- White shoes

## Personalise

Set up your project in a well-ventilated area. Cover surrounding areas to protect from overspray and read the product labels before use.

### Tape

1. Remove the laces.
2. Tape the sole of the shoe along with any other rubber areas.

### Undercoat

3. Apply 1 coat of White Knight Squirts Undercoat. This will help retain colour and avoid flaking. Dry for 1 hour.

### Spray

4. Fill the bucket with water, leaving 10 cm from the top.
5. Spray your favourite White Knight Squirts colours directly on to the surface of the water. Let the paint dry for 5 minutes.

### Dip

6. Holding the shoe upside down, dip it into the water catching as much colour on the surface as you can.

### Dry

7. Allow the shoe to stand. Repeat the above steps on the second shoe.
8. Once dry, remove the tape, add your laces and enjoy your new shoes!

## Post

Post a picture of your new shoes and hashtag **#WKCRAFTERNOON**.
